

# HDMI 4x4 MATRIX EXTENDER - 60m

# HENRAC TECH

website: [www.henractechn.co.za](http://www.henractechn.co.za)

**Description:** An **HDMI Matrix** is the ultimate in home or office Audio / Visual distribution. A 4x4 Matrix will select anyone of 4x HDMI inputs and route them to anyone of 4x outputs irrespective of the settings of the other 3 outputs. The Extender portion is a build-in function which allows these 4x outputs to be extended to other locations such as bedrooms, entertainment areas or boardrooms etc. via CAT6 cable. All outputs are Full HD (1080p) and can have a maximum CAT cable length of 60m per output.

**Purpose:** If you have multiple HDMI sources such as DSTV decoders, Blu-ray players, PC's, game Consoles and Android TV boxes etc. and more than one television in more than one location. No more arguments about who gets to what, where and on which Television. Easy and simple control via the single push of a button via remotes in each location or PC/LAN or home automation system.

All HDMI sources are now 'pooled' (same location) Any 4x.

DSTV / Satellite Decoders

Blu-ray / DVD Players

Laptop/ Desktop PC's

Video game Consoles

Media Players / TV Box etc.

**Device Supports:-**

TV's close to the Matrix (<15m) are Connected to the Matrix via HDMI cable. E.g. TV Cabinet in lounge or home theatre where all your HDMI sources, Matrix and main TV are located.

Extender Receiver 4x

**TV / Monitor / Projector**  
Located in extended location (60m)

'Normal' remote control of the device you selected e.g. DSTV Explora decoder.

Additional remote control to select anyone of 4x inputs

4x HDMI Inputs  
4x HDMI outputs (>15M)  
4x UTP CAT cable outputs (60m)  
Connect any number of TV's but individual outputs remain 4x

# HDMI 8x8 MATRIX EXTENDER - 60m

website: [www.henractechn.co.za](http://www.henractechn.co.za)

**Description:** An **HDMI Matrix** is the ultimate in home or office Audio / Visual distribution. A 8x8 Matrix will select anyone of 8x HDMI inputs and route them to anyone of 8x outputs irrespective of the settings of the other 7x outputs. The Extender portion is a build-in function which allows these 8x outputs to be extended to other locations such as bedrooms, entertainment areas or boardrooms etc. via CAT6 cable. All outputs are Full HD (1080p) and can have a maximum CAT cable length of 60m per output.

**Purpose:** If you have multiple HDMI sources such as DSTV decoders, Blu-ray players, PC's, game Consoles and Android TV boxes etc. and more than one television in more than one location. No more arguments about who gets to what, where and on which Television. Easy and simple control via the single push of an button via remotes in each location or PC/LAN or home automation system.

All HDMI sources are now 'pooled' (same location) Any 8x.

DSTV / Satellite Decoders

Blu-ray / DVD Players

Laptop/ Desktop PC's

Video game Consoles

Media Players / TV Box etc.

TV's close to the Matrix (<15m) are Connected to the Matrix via HDMI cable. E.g. TV Cabinet in lounge or home theatre where all your HDMI sources, Matrix and main TV are located.
